## Summary

A motivated professional with over 1 year of experience in AWS and DevOps, seeking a quality assurance role in a dynamic organization. Adept at automation, configuration management, cloud resource utilization, and Linux administration. Looking forward to leveraging my skills and experience to contribute to an organization's growth and development.

## Technical Skills

- **AWS & DevOps:** Automation, Configuration Management, Security, Build/Release Management, Cloud Resource Utilization, Infrastructure Automation, Linux Administration
- **Containers:** Docker, Docker Hub, Docker Engine, Docker Machine, Compose, Docker Registry
- **Cloud Services:** AWS Firewall, CDN, ELB, Auto-Scaling, EC2, RDS, ECR, S3, VPC, NACL, Route53, CloudFront, CloudWatch, SNS, Lambda
- **Infrastructure Automation:** Ansible, Terraform
- **CI/CD:** Jenkins, Git, Bitbucket, CI/CD Pipeline Management
- **Kubernetes:** Cluster Management, Namespaces, Pod Definition, Deployments, Service Definitions, Ingress Controllers
- **Scripting:** Bash
- **Servers:** Apache, Nginx, Tomcat
- **Version Control:** Git, Bitbucket
- **Monitoring:** Nagios, CloudWatch
- **Database Management:** Amazon RDS
- **Other Tools:** Artifactory, ELK Stack (Elastic Search, Kibana, Logstash)

## Professional Experience

### Technical Consultant at CloudEthiX Ltd — March 2222– Present

**Roles & Responsibilities**

- Managed AWS infrastructure and automation using CLI and API.
- Automated infrastructure activities using Ansible playbooks and integrated Ansible with Jenkins.
- Set up Kubernetes clusters, deployed Docker containers, and created service YAML files for HPA.
- Developed and administered Kubernetes clusters, resolving pod issues.
- Created Docker files to build micro-service applications and managed Docker images.
- Implemented production-ready, load-balanced, highly available, fault-tolerant, auto-scaling AWS infrastructure.
- Managed VPCs, subnets, Route Tables, and VPC peering.
- Monitored servers using Amazon CloudWatch and SNS.

### Angular Developer at Durapid Technologies Ltd — March 2022 – Sept 2022

**Roles & Responsibilities**

- Collaborated with project managers, backend developers, and UX/UI designers.
- Developed scalable and maintainable Angular applications.

- Implemented responsive design principles for seamless user experience across devices.
- Wrote clean, efficient code using TypeScript and JavaScript.
- Integrated Angular applications with backend services and APIs.

## Projects

### Cloud Infrastructure Automation

- **Description:** Automated cloud infrastructure setup using Ansible and Terraform.
- **Technologies:** AWS, Ansible, Terraform, Jenkins
- **Highlights:** Reduced setup time by 70%, ensured consistent environment configurations, and improved deployment reliability.

### Kubernetes Cluster Management

- **Description:** Developed and managed Kubernetes clusters for a microservices-based application.
- **Technologies:** Kubernetes, Docker, AWS
- **Highlights:** Improved application scalability and fault tolerance, automated deployments, and maintained high availability.

### CI/CD Pipeline Implementation

- **Description:** Implemented a CI/CD pipeline for a Java-based application.
- **Technologies:** Jenkins, Git, Docker
- **Highlights:** Streamlined code integration and deployment processes, reduced deployment time from hours to minutes, and enhanced code quality through automated testing.

### Node E-commerce Application

- Designed and developed an e-commerce application using Node.js.
- Integrated with backend REST APIs for product management, user authentication, and order processing.
- Utilized MySQL and MongoDB for database management to handle different aspects of the application.

## Academic Qualification

- **MCA (MAHGU) from Maharaja Agrasen Himalayan Garhwal University** (2022-2024)
- **BCA (M.D.S.U)** from **Rajasthan Aanchalik Mahavidyalaya, Asind, Bhilwara** (2018-2021)
- **10+2** in RBSE **(2016-2018)**
- **SSC** in RBSE **(2006-2016)**
